

A fluorescence microscopy image showing a cluster of cells. The cells are stained with a blue dye, likely DAPI, which highlights the nuclei. Interspersed among the blue-stained cells are several bright red spots, which could represent specific proteins or markers. The background is a light grey, slightly out-of-focus field.

# EUSARC 2018

The biology of sarcoma  
A residential workshop

31 May - 2 June 2018  
Bertinoro (FC), Italy

Abstract deadline: 30 March 2018

Info: [secretariat@eusarc.com](mailto:secretariat@eusarc.com)

[www.eusarc.com](http://www.eusarc.com)

## Aims:

- to provide a forum to increase knowledge in sarcoma biology and pathophysiology in order to offer a more effective patient care
- to fill the gap between biological and clinical research
- to establish and consolidate a network of scientists who are keen to collaborate in the field of sarcoma
- to promote actions to encourage and support in-training scientists in sarcoma research
- to raise public awareness on the clinical relevance of sarcomas and the importance of promoting sarcoma research

## Special topics:

- Biomarkers and liquid biopsy
- Tumor microenvironment
- Stemness and malignancy
- Omics
- Molecular pathways
- Cancer metabolism
